

KLAUS CEDILLO

I decided to study computer technology because of my great passion for solving problems, especially when it involves programming. I am excited to find new and creative ways to solve problems with algorithms.

My eagerness for programming began at an early age in robotics courses, but it was consolidated during high school when I joined the robotics team at the Monterrey Institute of Technology and Higher Education in Mexico City, Nautilus 4010. During my stay, I participated in national (Mexico) and international (Houston, USA and Calgary, Canada) events as the programmer and electronic support for the robot we built from scratch.

In my professional life, I hope to be able to work on projects that help change how we work, organize ourselves, and live in general. I firmly believe that, programming is capable of helping everyone in a scalable and accessible way for everyone.

About Me

Name

Klaus Manuel Cedillo Arredondo

Address

Cda. Tecolapa 11
Santa María Tepepan
Xochimilco, 16020
CDMX, México

Phone Number

+52 55 4386 4454

Birthday

04-10-2001

Drivers License

A
